Deep Learning Enterprise Smart Assistance

**Does your organization
have copius amount of
unstructured data ?**

Resonate ?

Are your teams finding it
difficult to find relevant
answers to their question
from this pool of data ?

Smart TechM Solution

A Question and Answer system which helps enterprise users to search relevant answers from unstructured data within the organization using Deep Learning (DL) by teaching contextual knowledge and using Natural Language Processing (NLP)

Business Benefits

Faster Decision Making :

Simplify the ability to search relevant answers from anywhere in the enterprise.

Improves Productivity

Being able to find relevant answers in a jiffy than going through multiple answers to find the most relevant one.

Better Employee Collaboration:

Saves lot of time in getting the accurate information from multiple sources
