

**Advance Your Digital
Strategy with a
Multi-cloud API
Management Platform**

Connect Anything, Change Everything!

We are in the midst of an unprecedented phase of digital transformation. API, once seen as a tool for programmers, is now providing both a new route to market as well as enabling disintermediation of the value chain that supports that route to market. Thus, API-led connectivity transforms business decisions into actual product offerings.

However, today's organizations are confronted with numerous challenges like adaptability scalability, customization and so on., due to their legacy or inflexible API management solutions and stacks. Therefore every organization needs an effective and adaptable API management.

Tech Mahindra's Enterprise Integration Solutions is one of the largest practices among Global SIs with a market leadership position in most verticals. EIS Practice has profound expertise in the complete gamut of API Management Platform which includes Life Cycle management, Security, Monitoring and so on.

Tech Mahindra is an Apigee Global System Integration Partner

Apigee is part of a Google Cloud product

APIGEE Practice Highlights

- ✓ In-house Centre Of Excellence
- ✓ Skilled resources with Extensive Experience
- ✓ Thought Leadership and E2E ownership

Tech Mahindra Enabled Apigee Success Stories

For a leading telecom operator in US, Tech Mahindra helped in developing open APIs which enabled connectivity with 50+ new services through 100s of developers. This resulted in breakthrough innovation & monetization.

For a leading auto manufacturer in US Tech Mahindra enabled voice based vehicle control service through an API layer which provides authentication, authorization and security.

For a leading telecom company in Europe TechM helped rollout API platform to drive customer loyalty and satisfaction by providing seamless Omni-channel customer experiences and to enable partner ecosystems to enable growth in adjacencies

ENTERPRISE INTEGRATION SOLUTIONS (EIS) PRACTICE
