

Government

Problem to address

- Multiple stakeholders leading to reduced visibility
- Build more trustworthy & secure system
- Improve Efficiency
- Piled up paperwork and lost files

Our Solution

- Blockchain based solution which deploys a smart contract to verify document sharing procedure and ease of sharing documents with citizens and entities with time cap
- It uses smart hub as dashboard for enhanced customer experience, which has immutable and secure records with paperless sharing, where audit trail of ownership transfer with ADM & multiple entities are done.

Benefits

- Immutable and secure records with paper less sharing
- Authority with the owner to share digitally verified deed
- Ease of sharing the documents with citizens and entities with time cap
- Using smart application as dashboard for enhanced customer experience

Land Registry in Middle East

Enabling a new service of Digital Deed and securing sharing of data in a Smart Application design by the local municipality, impacting the net happiness quotient of the citizens
