READY TO WORK

MAKING WORKPLACES AND COMMUNITIES SAFER

As we continue to fight the global pandemic, striving to flatten the curve, It is now time to get back to our work-stations, and begin to restore normalcy. But the question remains:

- Is it safe to sit next to my colleague?
- How can we ensure business continuity during the pandemic?
- Can I visit my office canteen to have lunch?
- Are we complying with the regulations and guidelines?
- Is the support staff tested for COVID-19?

Connected World.
Connected Experiences.

Our Holistic Solution for COVID-19 RISK MANAGEMENT

Capable
Mobile Device capable of performing more than 32 tests

Trusted
ISO 13485-2016 & CE certified, CDSCO cleared and Clinically tested

Personalized
Mobile App facilitating individual tracking & Teleconsultation

Accurate
~96% accurate for COVID-19 Antibody testing Approved by ICMR

Scalable
Scalable solution with real-time decision making dashboard

Secure
Best in class secure data architecture, software & cloud archives

The Solution Further is augmented by:

AI/ML enabled point-of care device facilitating rapid digital diagnostics to generate reliable results

User friendly Mhealthy mobile App enabling self assessment, individual tracking and teleconsultation

Multi-parametric screening including test for COVID-19 Antibody, blood glucose, BP etc.

A comprehensive data dashboard facilitating data driven decision making for the employer

How Does it Work:

With MHealthy, returning employees will go through five simple steps before they approach their work-stations:

- After Loging in on the M-Healthy app, a primary screening is done at the entrance
- Vitals Screening and Antibody Tests will be conducted for every returning employee
- A Risk profile is generated based on the screening results
- Tele-health consultation is provided post results
- Antibody test will be conducted post recovery

Our Mhealthy keeps you, your colleagues and your family safe.
